

BIOINFORMATICS INTERNSHIP

Session seven

FUN FACT

- Margaret Oakley Dayhoff is known as the “mother” of bioinformatics. As she pioneered the application of computational methods to biochemistry.
- She used computers to analyze her in theoretical chemistry with punch card machines to calculate resonance energies.

COSMO SET UP

- Conda environment
- Tmux (use guide for commands)

VIM (AGAIN!)

- Use guide on github
- Clone learning.txt and play with vim

PUT FASTA FUNCTION FILE ON ALL
COMPUTERS

FORK

EXIT SURVEY
